## Education

**H & H B Kotak collage (Saurashtra University, Rajkot)** Gujarat, India

*BCA and MSc IT (Sarvodaya Collage, running last sem)* *Sep 20 – Oct 26*

## Experience

**Inlancer Technologies** *Rajkot (On-Site), July 23 – Present*

- ***Project Portfolio***

- **Mr. Trust** *Technology: Django, Django REST Framework, PostgreSQL*
  - *Developed a customer-centric review platform that enables users to submit detailed feedback and upload images*
  - *Engineered the backend architecture and RESTful APIs to ensure seamless data flow between the client and the database.*
  - *Built a comprehensive admin dashboard for streamlined management of user reviews and platform moderation*

- ***SM Toll*** *Technology: Django, Django REST Framework, MySQL, Vue.js*
  - *Architected a high-traffic Toll Plaza Management system to automate lane operations and toll collection.*
  - *Developed scalable backend APIs using Django REST Framework to handle real-time transaction processing and logging.*
  - *Collaborated on the integration of a Vue.js frontend to provide a responsive interface for plaza operators.*

- ***F&F Restaurant*** *Technology: Django, Django REST Framework, Celery, MySQL*
  - *Engineered a restaurant booking and management system featuring time-sensitive menu displays and automated scheduling.*
  - *Implemented **Celery** background tasks to handle asynchronous operations such as reservation confirmations and system maintenance.*
  - *Optimized database schemas in **MySQL** to manage complex booking availability and menu rotations efficiently.*

- ***WhatsApp CRM(Liliya)*** *Technology: FastAPI, SQLAlchemy, MySQL, WhatsApp Business API*
  - *Built a high-performance CRM using **FastAPI** to facilitate real-time customer engagement through Meta's WhatsApp Business API.*
  - *Integrated automated campaign scheduling and real-time chat capabilities to improve business-client communication workflows.*
  - *Utilized SQLAlchemy for efficient database ORM mapping and secure data handling within a **MySQL** environment.*
  - *Built a flow and chats real time show in message box using socket IO*

- ***Sagar Aqua*** *Technology: FastAPI, SQLAlchemy, MySQL, TCP, Socket IO*
  - *Developed an IoT-based automation system for fishery pond management, focusing on real-time monitoring of oxygen levels.*
  - *Implemented **Socket.io** and TCP protocols to enable low-latency communication between hardware sensors and the management dashboard.*
  - *Automated mechanical operations, such as motor control (on/off triggers), based on real-time environmental data.*

- ***NodeJS:*** *Use for setup socket IO*
  - *For WhatsApp CRM set socket io implement for show real time messages and media files*

## Skills

**Languages**: Python | **Databases**: MySQL, SQLite, MongoDB,
**Technologies and Frameworks**: Git, React, Fastapi, Django, Django REST Framework, Socket IO, AWS(EC2), NodeJS(Socket Implement), Celery
**Core Subjects**: Object Oriented Programming, Database Management System
