# DENISH BORAD

**Backend Developer | Python (FastAPI, Django), Distributed Systems & Cloud**

mailto:danishpatel5106@gmail.com • +91-97247-43506 • Rajkot, Gujarat, India

**LinkedIn:** https://linkedin.com/in/denish-borad-5249b1250 • GitHub: https://github.com/BoradDenish • Portfolio: https://boraddenish.github.io/portfolio

## PROFESSIONAL SUMMARY

Performance-driven Backend Developer with 3+ years of experience designing, architecting, and deploying high-concurrency RESTful APIs, distributed microservices, and real-time IoT platforms. Deep technical proficiency in Python (FastAPI, Django, DRF), asynchronous message queues (Celery, Redis), relational database engineering (PostgreSQL, MySQL, SQLAlchemy), and low-latency socket networking (WebSockets, Socket.IO, raw TCP sockets). Demonstrated success in deploying secure Linux cloud infrastructure on AWS EC2 (Ubuntu, Nginx, Docker, CI/CD), integrating multi-gateway payment tokenization (Stripe, PayPal Vault, Razorpay), and automating Meta WhatsApp Cloud API conversational marketing engines.

## TECHNICAL SKILLS

- **Languages & Frameworks:** Python, FastAPI, Django, Django REST Framework (DRF), SQL, JavaScript, React.js, Node.js (Socket.IO)
- **Distributed & Real-Time:** Celery, Redis (Caching & Message Broker), WebSockets, Socket.IO, Raw TCP/IP Socket Networking, Event-Driven Architecture
- **Databases & ORM:** PostgreSQL, MySQL, SQLite, MongoDB, SQLAlchemy, Django ORM, Connection Pooling, Complex Query Optimization, Indexing
- **Cloud, DevOps & Systems:** AWS (EC2), Linux (Ubuntu), Nginx Reverse Proxy, Docker, Git/GitHub, CI/CD Pipelines, Systemd Daemonization, SSL/TLS
- **Third-Party APIs & Payments:** Meta WhatsApp Cloud API, Stripe, PayPal REST/Vault, Razorpay API, FCM (v1 HTTP), Google Distance Matrix API

## PROFESSIONAL WORK EXPERIENCE

**Backend Developer** | **Master Global Tech** — **July 2026 – Present** | Rajkot, India

- **System Architecture:** Architecting high-throughput REST APIs and asynchronous microservices with FastAPI and Django, focusing on automated dispatch platforms and real-time operations.
- **AI & Cloud Solutions:** Developing computer-vision enabled gatekeeping services (YOLOv8 ANPR) and containerized deployment workflows using Docker, PostgreSQL, and Linux AWS EC2 environments.
- **Performance Engineering:** Leading API performance benchmarking and caching strategies using Redis, maintaining sub-millisecond data retrieval and 99.9% uptime across production services.

**Backend Developer** | **Inlancer Technologies LLP** — **July 2023 – June 2026** | Rajkot, India

- **Scalable APIs & Queues:** Engineered and deployed 15+ production RESTful APIs and asynchronous background task pipelines (Celery & Redis), slashing endpoint response latency by over 40%.
- **IoT & Socket Networking:** Built persistent two-way socket pipelines with WebSockets, Socket.IO, and raw TCP/IP sockets for IoT sensory telemetry and real-time multi-agent live chat.
- **Fintech & Cloud DevOps:** Constructed secure multi-provider checkout systems (Stripe, PayPal Vault, Razorpay webhooks) and orchestrated AWS EC2 Ubuntu servers with Nginx and CI/CD.

## KEY PRODUCTION PROJECTS

**OpenUp Portal — On-Demand Roadside Assistance & Lockout Dispatch Platform** | *Python, Django, DRF, Celery, Redis, MySQL, Google Distance Matrix API, Stripe, PayPal Vault, FCM v1*

- **Dispatch & Fintech:** Constructed an on-demand dispatch engine dynamically pairing stranded motorists with mobile locksmiths via Google Distance Matrix API proximity routing; engineered tokenized payment vaulting (Stripe & PayPal Vault) for pre-auth and automatic charge capture.

**Liliya API — Enterprise WhatsApp Marketing & Conversational Automation SaaS** | *Python, FastAPI (ASGI), Celery, Redis, Socket.IO, MySQL, Meta WhatsApp Cloud API, OpenAI API*

- **High-Throughput SaaS:** Architected an asynchronous messaging engine broadcasting 10,000+ personalized WhatsApp messages/min via Meta Cloud API; built a real-time multi-agent live chat inbox powered by Socket.IO and automated AI bot workflows.

**Society Mitr — High-Performance Housing Society ERP & AI Vehicle Gatekeeping** | *Python (FastAPI, YOLOv8/FastALPR), PostgreSQL, SQLAlchemy, Razorpay, Docker*

- **AI Gatekeeping & ERP:** Developed multi-tenant housing society ERP featuring dynamic RBAC, automated maintenance invoicing, Razorpay billing, and a computer vision microservice running YOLOv8 for automated number plate recognition (ANPR).

**ThinkX & Sagar Aqua — Enterprise IoT Cloud Backend & Real-Time Sensor Telemetry** | *Python (FastAPI), PostgreSQL, Redis, Celery, WebSockets, Raw TCP Sockets, Socket.IO*

- **Mission-Critical IoT:** Engineered persistent raw TCP and WebSocket socket architecture connecting edge IoT panels and dissolved oxygen sensors; automated soft-starter motor relays and sub-second emergency escalation workflows.

• **Additional Notable Systems:** Mr. Trust (Django/DRF Customer Review Platform), SM Toll Collector (Multi-Plaza Transit Fare POS & Auditing), F&F Restaurant (Table Booking & Reservation Backend with Celery), and Industrial Label Printer Suite (Thermal TSPL Barcode/QR Printing via Win32 FFI & Port 9100).

## EDUCATION

**Master of Science in Information Technology (M.Sc. IT)** | Saurashtra University (Sarvodaya College), Rajkot, India (CGPA: 8.71 / 10.0) — **2024 – 2026**

**Bachelor of Computer Applications (BCA)** | Saurashtra University (H & H B Kotak Institute), Rajkot, India (CGPA: 7.90 / 10.0) — **2019 – 2022**
